

Top Coat Sealer-Pigmented A-1475

Product Description

Americrete Top Coat is a two part, 60% solids, pigmented urethane top coat that can be applied over all of Americrete products. This product creates a hard, protective film which is abrasion, impact, and mar resistant. This product is also chemical resistant to a broad range of chemicals, and is excellence for exterior applications due to it's ability to retain its gloss over a long period of time, and is U.V. resistant.

Coverage Rate

Top Coat should be applied with a brush, roller, or airless sprayer over a primed surface at a rate of 250-300 sq. ft. per 1 gallon kit with a ¼" nap roller.

Primary Uses

Top Coat is primarily used as a finish coat over Americrete Products to provide a thick protective film over these coatings. Excellent for exterior use.

Application

Top Coat should be applied with a brush, roller, or airless sprayer at a rate of 400-600 sq. ft. per 1 gallon kit with a ¼" nap roller over primed concrete surfaces. May be applied at a rate of 200 sq. ft. per gallon as a fill coat in aggregate systems with a squeegee and back rolling with a ¼" nap roller. Heavier applications will retain more gloss than thinner applications.
