

Product Description

Americrete Top Coat is a two part, 60% solids, clear finish, urethane top coat that can be applied over all of Americrete products. This product creates a hard, protective film which is abrasion, impact, and mar resistant. This product is also chemical resistant to a broad range of chemicals, and is excellence for exterior applications due to it's ability to retain its gloss over a long period of time.

Coverage Rate

250-300 Square Feet per 1 gallon kit or with Americrete's A-1925 Applicator.

Primary Uses

Top Coat is primarily used as a finish coat over Americrete Products to provide a protective film with a Clear Finish over these coatings. Excellent for exterior and interior use.

Application

Top Coat should be applied with a brush, roller, A-1925 Applicator or airless sprayer at a rate of 250-300 sq. ft. per 1 gallon kit with a ¼" nap roller over primed concrete surfaces. May be applied at a rate of 200 sq. ft. per gallon as a fill coat in aggregate systems with a squeegee and back rolling with a ¼" nap roller. Heavier applications will retain more gloss than thinner applications.
