

1-8DEZ

SPECIFICATIONS:

Blasting Width: 9 in. (229mm)

Travel Speed: Manual

Prod. Capacity: Up to 250 sq.ft./hr.

Motor: 3.35 hp

Amperage: 18A

Voltage: 120V, 1 ϕ , 50 or 60 Hz

Power Cord: 50 ft.

Dust Hose Connection: 2 in. (51mm)

Dimensions: L 45 in. (1143mm) x W 12.5 in. (318mm) x H 38 in. (965mm)

Weight: Net 123 lbs (56kg)

The Blastrac 1-8DEZ is a highly portable, lightweight shot blasting system used to prepare concrete surfaces prior to the application of paint or coatings and is perfect for smaller jobs such as residential garage floors, pool decks, and small industrial floors. Optimal blast-wheel RPM is achieved through a unique gear set in the motor. With a manual travel speed and 9 inch blast pattern, this small blast

machine is also ideal for balconies, areas around equipment and obstructions, and other tight spaces.

The 1-8DEZ strips, cleans and profiles in one easy step. There is no rinsing or drying time as with chemical acid etching, and the profile provides a better surface for coating adhesion. When attached to the BDC-1216 Blastrac dust collector, the 1-8DEZ operates virtually dust-free. Cost-effective and environmentally friendly, this affordable shot blaster is a labor and time-saving cleaning system for small to medium sized jobs.

FEATURES & BENEFITS:

- Lightweight unit is easy to handle and transport
- Maneuvers smoothly with front caster-wheel design
- Operates on 120V, single phase, found on most job sites
- Simple design uses fewer moving parts, requires less maintenance
- Can blast within 1 1/2" of front wall and edges to within 3/4" when side magnet seals are removed
- Heavy-duty design with thicker liners for increased wearability
- Operates virtually dust-free when connected to BDC-1216
