

BMP-335GHY

SPECIFICATIONS

Cleaning Path:	13.2 in. (335mm)
Performance:	Up to 570 sq. ft./hr.
Drum Diameter:	8.5 in. (216mm)
Drum Speed:	1,000 RPM
Engine:	15 hp Hatz Diesel
Drum Motor:	15 hp hydraulic
Drive Motor:	2hp hydraulic
Unit Supplied:	BMP-335GHY Scarifier; User's Manual; Complete Drum assembly with shafts, flails/cutters, and spacers
Dust Hose Connection:	3 in. (76mm)
Dimensions:	L 59 in. (1498mm) x W 24 in. (609mm) x H 37.5 in. (952mm)
Weight:	895 lbs (406kg), excluding drum

The Blastrac® BMP-335GHY scarifier is a heavy-duty machine designed and manufactured for the most demanding of jobs. With variable speed, forward and reverse, this heavy-weight performer can be maneuvered or driven without the scarifying drum engaged.

An easy-lift system lowers and raises the drum, and fine-height cutting adjustments are stayed in position with controls that are easily accessible to the operator. This unit is comfortable to use, easy to move and creates minimal vibrations.

Heavyweight for increased performance, this synchronous-belt driven unit has 2 independent, hydraulic brake motors for adjustable feed speed, and is ideal for marking removal on airports and roads; preparation of large surfaces: etching, cleaning, coating removal, grooving, descaling, derusting (ship decks, tanks).

- Dust free (when connected to appropriate Blastrac Dust Collector)
- 2 Independent hydraulic brake motors
- New foot-pedal-equipped drive system
- Self-propelled, no need to push it, even when going up inclines!
- Adjustable braking device
- Double, micrometric adjustment of the scarifying depth: no risk of underground deterioration, better precision
- Several tooling options for diversified applications
