

# Finish & Polishing Systems AUTOMATIC CHEMICAL APPLICATOR

## CONDOR

Condor is the new Diamatic® chemical applicator that takes the guess-work out of flow control. This new wide span applicator dispenses floor finish chemicals at a timed and precise level via its electronic control.

Designed for use at a walking pace, the Condor is easy to use and control. Interchangeable heads are available in 28", 36", and 48" widths, and the special lambs wool and micro filament mop make smooth work of the application process. The wide span Condor, powered by two small 12-volt rechargeable batteries, can dispense floor finishes or densifiers for up to 20 hours before needing a recharge.

The extremely durable frame is lightweight, constructed of aircraft grade aluminum, and made to perfectly handle a five-gallon container. The electronic control, placed for convenience, and the cushioned handle make for precise control and comfortable walking lead of the unit.

The Condor, a fully-patented machine, can increase your profit margin, especially on large jobs like warehouses, malls, and big-box stores, with the speed and quality control of chemical applications.

The professional surface-prep contractor will appreciate the advantages of the Condor and why Diamatic is the best reflection of quality.

The Condor is the perfect applicator for Diamatic Ultra-Flor densifiers, guards and finishes.

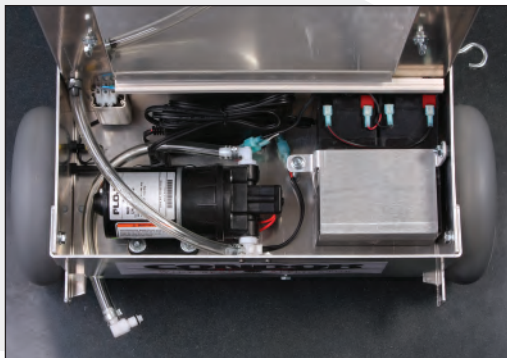

### CONDOR DIA-CHV36

#### FEATURES & BENEFITS:

- Ideal for all sized jobs from small businesses and residential applications to schools, malls and large industrial/warehouse complexes
- Precise application control for densifiers, guards, and finishes
- Virtually streak-free applications
- Magnetic sensor control activates flow and minimizes material waste
- Aircraft grade aluminum frame with durable wheels and castors
- Easily transportable and can be stored compactly
- Long-life applicator/mop pad
