## What is Ram Board?

For over 10 years, Ram Board has been the number one choice for temporary floor protection in the construction industry. This heavy-duty, Flex-Fiber™ reinforced product is engineered to protect new and existing floors from the heavy demands of the jobsite. Designed with cost and efficiency in mind, it lays out fast and is re-usable. Ram Board is non-staining and breathable allowing for the continued curing of new floors. It provides the perfect solution when protecting new or existing concrete, wood, tile, stone, linoleum, vinyl composition tile (vct), terrazzo, epoxy, and most other floor types.

The following is a description of Ram Board temporary floor protection:

- Roll Size: 38" x 100' (317 sq. ft.)
- Thickness: 46 mil
- Weight: 50lbs

Heavy-Duty | Non-Staining | Re-Usable | Green Product | 100% Recycled | Lays Fast and Flat

Ninety percent of all construction projects need temporary floor protection and Ram Board has been trusted by some of the most reputable companies in the world to protect their investments. Many of the nation's leading architectural firms have Ram Board named for temporary floor protection in their building specifications. Ram Board has been used on everything from a single private residential remodel to the movie set of *Pirate's of the Caribbean*, to the new construction of Bass Pro Shops. Below is a list of several other projects Ram Board has provided protection for.
